TERMS.

Our cash terms to all dealers having accounts with us, are invariably *five* per cent. fifteen days from date of shipment (payable in New York funds, as we do not allow exchange). At the expiration of fifteen days all accounts subject to our three months' draft without either notice or statement, except such as are embodied in draft.

FACILITIES FOR SHIPMENT.

Rochester, as a point of shipment, is not surpassed by any city in the country. Low rates of freight can be relied on to all competing points, and reasonable rates to all points. We are always ready to investigate matters of freight and will give our best attention to any inquiries that may be made.

AGENTS.

We have no agents authorized to make any contracts on our behalf, or to collect money for us, or to settle any accounts, except on our written ORDER.

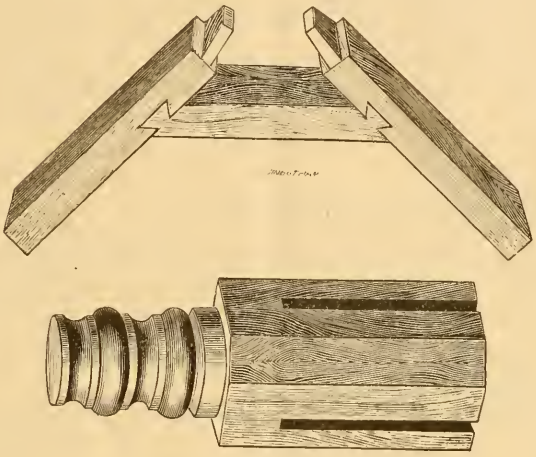
GUARANTEES.

We guarantee the quality of our goods, and if they are not found to be as represented, they may be returned at our expense. We do *not* guarantee safe delivery, nor rates of freight. We tell you, if asked, what freights should be, according to tariff ; but if they are overcharged, that is a matter for you, as owner of the goods, to settle with the company. The goods have passed out of our possession and we can have no possible claim in regard to them.

Our advice and request to all parties is not to take goods from the freight house, without seeing that they are in good shape and that they correspond with the Bill of Lading sent with invoice, both as to the number of pieces and the classification of the freight. A careful attention to this request would frequently prevent a good deal of trouble.

SPECIAL FEATURES OF

The "Giant Frame" Extension Table.



Patented July 23, 1878.

This cut represents *top of* leg and *ends* of rails, with corner-brace let in, showing method of construction. The leg is held in place by one No. 11 screw through the corner-brace. Any practical cabinet maker will readily see the great strength gained for the frame by this plan.

The advantages of our tables are as follows :

1st. **A Very Strong Frame,** *from which the legs can be removed or replaced by new ones, should any be accidentally broken.*

2d. *Our New Patent* **Carved Spiral Leg,** *unquestionably the most desirable leg ever offered to the trade. Elegant, artistic and unique. This pattern alone will sell our table in preference to, and at a better price than any other table in the market.*

3d. **Metallic Leaf Support** *on Drop Leaf Tables, and Catch fastening the tops together at the opening.*

4th. *The most* **perfect Slide** *ever invented; free running, but firm. Positively the only slide made on the true principle, and that will not stick or bind.*

5th. **Economy and Safety in Shipment.** *Third-class freights instead of first-class ; and the tables arrive in perfect condition.*
